

CHANGE YOUR WORLD®

About World Endeavors

- Experiential learning programs
- Founded in 2002
- Volunteer programs:
Cultural immersion focus
- Internship programs:
Professional immersion

Volunteering Abroad

International volunteering is something that everyone should try: another culture, another way of life. But we are part of the same world!"

Virginia, Zambia

Community Based Structure

- Designed to be mutually beneficial
- No financial burden for local organizations
- Needs/goals of the community prioritized
- Local participation
- Sustainability is key

Tanzania
Zambia
South Africa
Thailand
Costa Rica
Portugal

Project Types

- Childcare & Teaching
- Environmental/Wildlife Conservation
- Women's/Community Development
- Healthcare/Health Education

Healthcare projects

Zambia, Livingstone: clinics, communities and workshops!

- take part in home-based care
- clinic support
- health tasks
- HIV education workshops

Make an impact on those living in traditional rural villages

Real healthcare experience, hands on projects

Welcome to the Backpackers!

Healthcare projects

Cape Town: children, adults and hospice support / respite care

Help the community as there are not enough hands

- do basic healthcare and admin tasks to enable the trained staff to assess patients
- shadow doctors and nurses - learn by observing
- provide assistance at the hospital alongside medical staff

Dynamic program, where you can help in many different ways!

Today we are going to a hospice where we are in contact with adults and children. It's very nice because you talk to them a lot and get to know their culture and history.

*In all this we measure parameters such as blood pressure or temperature and give them the pills. In my opinion, however, the best part is being with them and discovering who they are! The other volunteers are very nice and a nice atmosphere was created! **Chiara P.***

Healthcare projects

Thailand, Bangkok: health center, community visits or health education projects at local schools!

- outpatient department
- assisting with patient vital signs
- community visits conducting physical health exams, eye exams, consultations, and providing vaccinations
- home visits and/or school visits to provide health education and health screenings at local schools

Cultural immersion, different possibilities!

Healthcare projects

Costa Rica, Atenas: local medical clinic and emergency clinic!

- shadowing clinicians
- take patient vital signs
- record medical history
- observe minor surgeries or physician-patient consultations
- ambulance calls

If you want to improve your Spanish, this is the right program for you!

Anyway, basic Spanish is required for this project.

Suggested for professional development
