General remarks

General:

Our bachelor programmes are divided into two faculties, Business & Management and Social Science.

We recommend that exchange students join one of our regular student cohorts in one of our bachelor programmes, *e.g. International Relations or International Business*, to avoid overlappings in the time schedule. Combinations of courses from different bachelor programmes and semesters might be possible in certain cases.

In Fall term 2022 we started with our restructured bachelor programmes in the business faculty (see programme offer) . The materialization of the programmes depends on the number of enrolled students. Especially for the programmes *Digital Transformation and Ethics*, *Strategic Diversity and Inclusion Management*, and *Social Psychology* we cannot guarantee that courses will be available.

All courses are offered in English, except the language courses.

Language courses:

There are also various languages offered at all levels. Please refer to the languages section to see what is on offer. **Please note that languages and levels offered (CEFR) are subject to availability.** Students are allowed to take up to two languages and **are encouraged to take German.**

Master level courses

Our Master courses are open to exchange students with the background and language proficiency required to succeed in class, provided there are still free spaces.

To take courses in our Master program in *Management* or *Social TransFormation and Politics, Philosophy & Economics*, , students need to fulfill the following **prerequisites**:

- completion of a Bachelor degree or equivalent status (e.g. in the *Grande Ecole* program),
- a background in business administration (for Master Management) or cultural sciences (for Social Transformation & PPE) and specific subjects (especially for semester 2 and 3 modules) and
- English proficiency on the level of C1.

The Master programs starts once a year in mid-October. Most of the Master courses offered in the spring semester require a cultural sciences background. They rely strongly on the content covered in the first semester of our Master program.

We ask students interested in taking Master courses to send us transcript of records with all the courses they have taken so far, both on the Bachelor and the Master level, so that we can check if they fulfill the prerequisites.

It is also possible to mix Bachelor and Master courses, depending on the course schedule.

Class modality:

Note that since the end of the Covid-19 restrictions, we have been returning to classes in presencial mode. It is important to note that therefore, we cannot generally offer hybrid or online classes. This is particularly important for the planning of exams. Students must be physically present for their classes and exams. This is also valid for re-take exams taking place at a later point in the semester.

Schedule:

The timetables for our subjects vary every semester. Therefore, the final schedule for each semester is only available a few weeks before the semester. Our exchange students get access to their schedule shortly before their semester starts. You can then check possible overlappings, especially if you have picked subjects from different study programs. Our academic affairs office will offer special appointments for exchange students in order to adapt their schedule and make possible course changes

Learning agreement:

Due to the reasons explained in the paragraph above, the subjects you chose for your learning agreement are due to change. We do not have the possibility to check individual learning agreements on possible overlappings way ahead of time. Therefore, be aware that choices made several months or weeks before the start of the semester are provisional .

It is important to emphasize that the Course Offerings for AY24-25 may be subject to change or availability.
