INTRODUCTION

Dear Student,

I would like to extend a warm welcome to the great family of the Università Cattolica del Sacro Cuore. Our University has trusted in young people for over a century as Father Gemelli, our founder, would constantly reiterate in his speeches. I wish to recall the words he pronounced at the inauguration of the academic year 1951/52: “I am convinced, and this is the school policy that I follow, that we must have faith in young people, we must help them, we must follow them, understand them”.

A trust, therefore, that makes it possible that you live a learning experience that will take you into the future, contributing to a professional, cultural and personal education. For this reason, our educational offer, characterized by high quality and international perspective, aims “to educate to a long and comprehensive view”. Study programs are characterized by the breadth of contents for ground knowledge, but also by a constant innovative approach, to tackle the continuous transformations of society and of job market. Also, study programs are built around the concept of transdisciplinary disciplines. All this, with the overarching goal to care for each individual member of the community in a beautifully designed and welcoming spaces that are also fully, functional and technologically advanced.

Each single day, during your student career, all the academic members will strive to transfer you technical, methodological and professional skills, including the leading-edge frontiers of science, building on a century-old tradition that has always privileged attention to ethical aspects, to the development of critical thinking and to the nurturing of human relationships. However, above all, we are strongly committed to a comprehensive education of the whole person, to allow you the exploitation of your talents. A vision that has the person at its core, with an intergenerational alliance and a genuine desire for innovation trusted on our solid background. These are the unique components of our identity that Università Cattolica del Sacro Cuore intends to preserve and transfer into the future.

A distinctive feature of our way of intending the educational community is the contribution that each individual member brings to the life of the University. I wish to thank the students involved in various activities, as tutors, representatives in the many academic Bodies, as members of joint and review committees, and in student associations. My calling is for an ever-increasing and ever-more passionate participation, seizing the many opportunities that the Università Cattolica del Sacro Cuore offers – from internships to international stages and volunteer experiences – to foster personal and cultural growth. A student, in fact, does not choose Università Cattolica only to study, but also to confront with real life, to forge lasting bonds, to imagine something that does not yet exist but that, at the same time, one perceives the urgency and importance of.

To make myself really close to you all beyond words, I intend to make up for a time and space to meet regularly with those who wish to engage in a dialogue or a discussion, aiming to build a relationship to grasp your needs more immediately and to correctly interpret your proposals for change or improvement. A first tool forgetting to know the University and your program is this guidebook, which contains all the main information. The course programs with detailed information, along with several news and additional communications on the many University’s initiatives, can also be found on the website <https://roma.unicatt.it/facolta/medicina-e-chirurgia?rdeLocaleAttr=it>

I sincerely wish that your student career at Università Cattolica will be full of enthusiasm and rich in satisfaction, well aware of the commitment and effort necessary to reach the ultimate goal.

Be proud, you are a member of the great family of the Università Cattolica del Sacro Cuore and you will contribute to its history and legacy.

*The Rector
Elena Beccalli*

NATURE AND AIMS OF UNIVERSITÀ CATTOLICA DEL SACRO CUORE

Article 1.2 of the Statutes of the University states that “*Università Cattolica is an academic community which facilitates the carrying out of studies, of scientific research and the training of young people for careers in research, teaching, public and private office, and in the liberal professions. Università Cattolica accomplishes these aims through dedicated higher education, and through teaching informed by Christian principles, which respect individual freedom to access all fields of knowledge and are in accordance with the concept of science as being at the service of mankind, conducive to respectful coexistence, and conforming to the principles of Catholic doctrine, in line with the universal nature of Catholicism and its specific call for freedom*”¹.

The nature of the University and its connection to the Catholic Church mean that teaching and research in all fields of knowledge, especially with respect to the great questions of our time, are approached with rigorous scientific method and intellectual depth. Research is carried out against a background of Christian values and towards human and Christian development of society. This has allowed the University to establish itself as a home for honest dialogue and lively debate with other cultures.

All those becoming members of Università Cattolica needs to be aware of the scientific and educational aims as set out above, to embrace them and to translate them into practice. Such awareness must inform students’ personal conduct and facilitate a sincere, diligent collaboration with all the staff, thereby avoiding any conduct not aligned with guiding values and principles of the University.

The Code of Ethics published on November 1st 2011 was laid out to reflect a sense of belonging, with the aim of strengthening fundamental values and principles, and of defining effective rules and guidelines for the conduct of all those who work and study at the University — professors, academic staff, students, and technical, administrative and services staff. Compliance with the Code of Ethics is an essential part of the mission, prestige and reputation of Università Cattolica. The Code of Ethics is available for reference at <https://www.unicatt.it/ateneo/universita-cattolica/codice-etico-e-modello-di-organizzazione--gestione-e-controllo.html> and on iCatt.

¹ Article 1.2 of the Statutes, approved by Rectoral Decree dated 24 October 1996. The university was legally recognized by Royal Decree No. 1661 of 2nd October 1924.

GOVERNANCE – ACADEMIC

Rector

The Rector is the highest academic authority and legally represents the University. The Rector calls and chairs meetings of the Board of Directors, the Executive Committee, the Academic Senate and the Advisory Board. He/She ensures that the operations of the university community in its many aspects converges towards the aims of Università Cattolica. The Rector may appoint one or more Pro-Rectors, who may be delegated to specific functions, and one Pro-Rector may be appointed to deputise for the Rector. The Rector's mandate is for four years, renewable for no more than two consecutive terms.

The current Rector is Prof. Elena Beccalli, Full Professor of Economics of financial intermediaries at the Faculty of Banking, Financial and Insurance Sciences.

Academic Senate

The Academic Senate is made up of Faculty members and is chaired by the Rector. The Academic Senate deliberates on scientific/academic issues which impact the university. The Academic Senate may establish degree programmes and has overall responsibility for the planning and coordination of teaching and research activities.

Faculty Dean

The Dean is selected by nomination and election. Full Professors in the faculty are eligible for nomination and all Full Professors in the faculty are eligible to vote. The Rector formally appoints the Dean. The term of office for Deans is four years, renewable for no more than two consecutive terms. The current Dean of the Faculty of Medicine and Surgery is Professor Antonio Gasbarrini.

Faculty Board

The Faculty Board is made up of all Full Professors, Associate professors, course representatives, assistant professors, and student representatives. The Board undertakes planning, organisation and supervision of teaching and proposes amendments to academic regulations, in accordance with the university Statutes.

GOVERNANCE - ADMINISTRATIVE

Board of Directors

The Board of Directors is vested with the broadest powers of ordinary and extraordinary administration of the University. The Board is made up of eighteen members: the Rector (who also acts as Chair); ten members appointed by the *Istituto Giuseppe Toniolo di Studi Superiori*; a representative of the *Holy See*; a representative of the *Italian Bishops' Conference*; a representative of the Italian government; a representative of the lay organization *Azione Cattolica Italiana*; and three Full Professors from the University campuses who are elected by Full Professors and Associate Professors.

General Manager

The General Manager is the head of the University's offices and services and directs and coordinates their activities. He oversees the direction, management and control of non-academic staff and personnel. Other responsibilities include ensuring compliance with legislation and university regulations, and implementing resolutions deliberated by University bodies in line with the University Statute. The appointment of the General Manager is approved by the Board of Directors following a proposal by the Rector. The current General Manager is Dott. Paolo Nusiner.

Campus Manager

The Campus Manager is responsible for the management of local operations achieving the objectives within the General Manager's overall planning and for the coordination of activities and as set down by the Board of Directors. Appointment of the Campus Manager is approved by the Rector following a resolution by the Board of Directors based on a proposal put forward by the General Manager. The current Campus Manager for the Rome Campus is Dott. Lorenzo Maria Cecchi.

PASTORAL SERVICES

General Ecclesial Assistant

Spiritual guidance for the University community is provided by the General Ecclesial Assistant with the support of staff who ensures individual assistance for personal and spiritual growth. The General Ecclesial Assistant is also responsible for coordinating the activities of the University Pastoral Board and organizing Theology courses. The current Ecclesial Assistant is H.E. Mons. Claudio Giuliadori.

University Pastoral Board

The University Pastoral Board plays an advisory role and shares ecclesiastical responsibility for the proper implementation of the objectives of University pastoral care.

Along with representatives from various components of the University, it ensures that the voice of students and of academic community is heard.

Pastoral Centres

In each campus of Università Cattolica there are pastoral centres which retain educational approach based on the principles of Christian values and the centrality of the person. The centre celebrates Holy Mass and provides opportunities for interaction, discussion, prayer and training. Pastoral assistants are available to meet with students to facilitate human and spiritual growth. Ecclesial associations and movements collaborate with the pastoral centre, as do prayer and voluntary groups: all contributes to the shared commitment to educating, providing witness and to an evangelizing mission.

In order to coordinate the work of the College of Theology Teachers, the Board of Professors of Theology is established, with twelve professors who participate to faculty assembly.

Board of the Professors of Theology

Chaired by the Rector and coordinated by the General Ecclesial Assistant, the Board has the task of streamlining the organization of theology courses. The courses play “a particularly important role in the search for a synthesis of knowledge as well as in the dialogue between faith and reason.” (*Ex Corde Ecclesiae*, 19).

ACADEMIC PROGRAMMES

According to Ministerial Decree n. 270/2004 and to European Qualification Framework (EQF)

Bachelor's Degree Programmes (Laurea) – 6th level EQF

The Bachelor's Degree programmes are established with reference to the 43 different degree subject categories set out by the Ministry of Education, Universities and Research (MUR), with 4 additional categories related specifically to the Health Care Professions.

These degree programmes are designed to provide both a solid knowledge foundation as well as a specialised professional training. The degree qualification is awarded after earning 180 credits. Graduates can then either enter directly the job market or to enrol into a Master's Degree programme.

Master's Degree Programmes (Laurea Magistrale) – 7th level EQF

The two-year Master's Degree programmes are established with reference to 101 degree subject categories set out by MUR, with the 4 additional categories related specifically to the Health Care Professions.

These degree programmes are designed to provide an advanced level of training to prepare students for highly specialised jobs in specific professional sectors. The qualification is awarded after earning 120 credits.

The academic offering also includes single-cycle Master's Degree programmes lasting either 5 or 6 years for which qualifications are awarded after earning 300 or 360 credits, respectively.

Postgraduate Schools (Scuole di specializzazione) – 8th level EQF

The aim of the postgraduate schools is to train doctors as specialists in a specific medical field: students completing a programme will be awarded the qualification of 'specialist' in their specific discipline.

For Medical Specialization Schools (Scuole di Specializzazione in Medicina) applications are open to graduates with academic qualifications in Medicine and Surgery.

Applications for some study tracks are open to graduates of subjects other than medicine.

Postgraduate schools' programmes are delivered according to local legislation or European Union regulations.

PhD Doctoral Programmes (Dottorato di ricerca) – 8th level EQF

The aim of PhD doctoral programmes is to provide candidates with the necessary skills to become an independent researcher and to compete for academic positions in universities, both in public and private institutions. Only graduates holding a Master's Degree may apply. Doctoral programmes last between three and four years and at the end candidates are awarded the qualification of Doctor (PhD).

Degree Categories

All degree programmes fall within degree categories established by the Ministry of Education, University and Research (MUR) which set out the essential components that each programme must provide. Universities are allowed to add distinguishing features to their programmes. Therefore, apart from the specific title of a degree programme, students are advised to refer to the specific category each programme belongs to.

Credits (Crediti Formativi Universitari - CFU)

Credits measure both individual study workload and classwork. One credit is valued at 25 hours of study, divided roughly into 12.5 hours of formal teaching with the several modalities considered and 12.5 hours of independent study. Each student is expected to earn around 60 credits per each academic year. Credits are not awarded until exams for the relevant course are passed. Examination grades measure performance while credits quantify progress within the programme. The Italian credit system (Crediti Formativi Universitari – CFU) conforms to the European Credit Transfer System (ECTS).

HISTORY OF THE FACULTY OF MEDICINE AND SURGERY “AGOSTINO GEMELLI”

Established by Presidential Decree n. 754 dated 18th June 1958, the Faculty opened in the academic year 1961/1962. Its headquarter is in Rome, in accordance with the wish expressed by Pope Pius XI in 1934 when donating the Monte Mario property to the Istituto Giuseppe Toniolo di Studi Superiori, the founding body and guarantor of Università Cattolica del Sacro Cuore. This wish was reiterated by Pope Pius XII in 1958, during the holy Mass to celebrate the fiftieth anniversary of the ordination and eightieth birthday of Father Agostino Gemelli, founder and first Rector of Università Cattolica. Since the first inception of the university his aspiration was to include a Faculty of Medicine because:

“Catholics are increasingly aware of the need for doctors who are informed by Christian values in the exercise of their profession, i.e., doctors with a spirit educated to observe Christian rules seeing in patients unhappy brothers in need of help.” (Perchè i cattolici italiani aspirano ad avere una Facoltà di Medicina, Vita e Pensiero, 1958).

In line with the overall aim of Università Cattolica del Sacro Cuore, the Faculty of Medicine and Surgery seeks to graduate scientifically and technically qualified professionals who can add a Christian anthropological dimension to their profession. To this aim, the Faculty fosters job and study environment where scientific and religious views of the world merge cohesively, for a true interpretation of the human experience as a whole.

ACADEMIC STAFF OF FACULTY OF MEDICINE AND SURGERY “AGOSTINO GEMELLI”

THE MASTER'S DEGREE PROGRAMME IN MEDICINE AND SURGERY

The Medicine and Surgery Programme is entirely taught in English, with a study plan and learning objectives matching those of the most prestigious international medical schools in the EU and North America. The Programme aims to teach a profession where medical knowledge merges with clinical competence and integrates professionalism and social responsibility. In this respect, the Programme is not the traditional, sequential teaching of individual disciplines in isolation but rather a constant reminder of how foundational sciences integrate with medical knowledge to develop clinical skills, medical competence, and a professional attitude.

The aim of the single-cycle Master's Degree programme in Medicine and Surgery is to educate, help and support future medical practitioners with professional knowledge enriched by a multidisciplinary and integrated view of the most common issues related to health and illnesses. The scope of this programme is oriented towards the community and the regional area, with specific focus on prevention and wellbeing.

Skills and attributes that graduates will exhibit include the following:

- 1) communication skills;
- 2) continuing education and good self-assessment skills;
- 3) strong analytical and problem-solving skills for medical practice;
- 4) in-depth and focused clinical experience based upon scientific evidence;
- 5) continuing professional development and update of medical knowledge;
- 6) wide-ranging and interdisciplinary education.

One outstanding feature of the programme is the complete integration of basic and clinical sciences. This is achieved through constant use of a multi-disciplinary approach and early involvement in patient management. In addition, not only is there an emphasis on medical anthropology and bioethics, but there is also focus on fine-tuning communication skills to deal with patients and their families which is an essential part of the six years of teaching.

The programme provides a strong foundation as well as all-round theoretical and practical competence. Students also acquire skills for independent decision-making and are trained to deal effectively with health issues from the viewpoint of prevention, diagnosis, prognosis and treatment.

STUDY PLAN ACADEMIC YEAR 2024/2025

To graduate from the Master's Degree programme, all students must follow the Study Plan set out for their particular degree programme, designed in compliance with teaching regulations and with Faculty Board directives. Students must attend all activities and obtain credits as listed in the study plan. Credits are earned by passing exams or other specified forms of assessment and evaluation.

Should new study regulations be activated or should study plan regulations be changed or revised, students outside the prescribed degree timeframe will have to adjust their study plan accordingly.

Students of Medicine and Surgery are required to attend all teaching and professional activities in their study plan to earn the required 360 credits. Attendance will be monitored by academic staff and recorded in line with regulations set down by the Master's Degree Programme Council. Registration for exams requires a certified attendance record.

The Study Plan, compliant to the Decree n. 270/2004, including all courses students must take as of enrolment in academic year 2024 until graduation in year 2030, is included in the Annex A to this Guidebook.

ACADEMIC CALENDAR A.Y. 2024/2025

The calendar of academic year 2024/2025 is published on the University *website*:

<https://studenticattolica.unicatt.it/calendario%20accademico%20Medicine%20and%20surgery%202324%20ver%201.pdf>

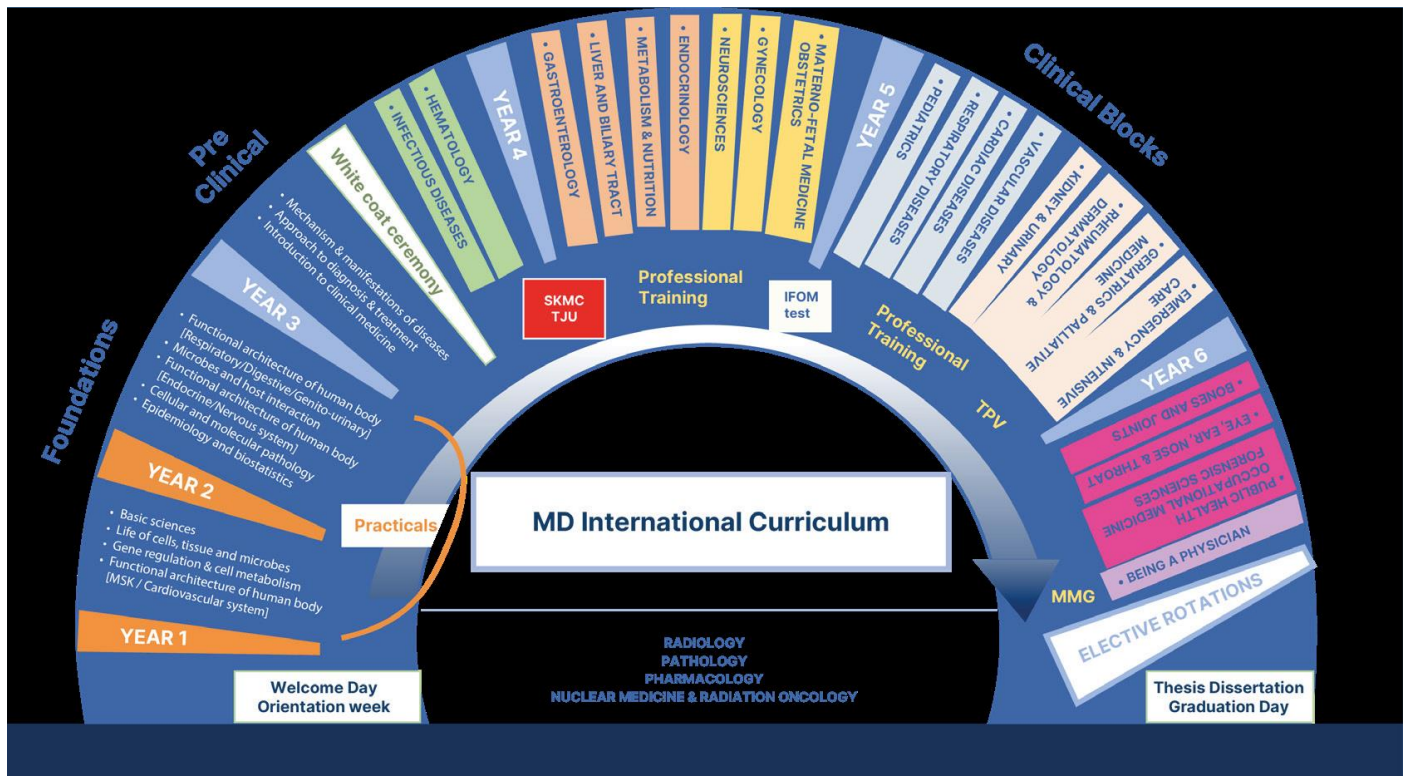

PROGRAMME STRUCTURE AND GENERAL INFORMATION

The study plan is intended to condense the foundational sciences within the initial two years with specifically designed courses like Functional Architecture of the Human Body where anatomy, embryology and histology and physiology coalesce almost into a single discipline.

By the second semester of Year 2, students approach Pathology and learn elements of Epidemiology and Anthropology necessary for the transition to the clinical phase.

The first semester of Year 3 is already a pre-clinical phase where the students acquire all the knowledge necessary for the transition to the clinical phase that begins with Introduction to Clinical Medicine.

During the second semester of Year 3, students begin a series of 20 clinical blocks, an immersive learning experience, modeled on the most current approach to the management of clinical scenarios, and organized by organ or apparatus, stage of life or intensity of care. Each clinical block includes dedicated modules for medicine, surgery, radiodiagnostics, pathology, pharmacology, treatment modalities and other modules as appropriate. In the final course, Being a physician, the students will be challenged with real clinical cases to test their clinical skills and medical competence.

PROFESSIONAL TRAINING

During clinical studies (Years Three, Four, Five and Six) students must acquire specific knowledge in internal medicine, general surgery, paediatrics, obstetrics and gynaecology, as well as in medical-surgical specialities. For this purpose, students will be required to undertake professional training by participating in an internship in several healthcare units/services designated by the Degree Programme Committee.

Tutors are assigned to specific groups of students and undertake teaching as well as tutoring. Tutors also record attendance in students' activities book.

Clinical training at Gemelli Hospital

Upon the symbolic ceremony of the White Coat, students of the Medicine and Surgery Programme move to Gemelli Hospital, the affiliated academic medical center. Gemelli is a 1500-bed hospital with Divisions/Units/Centers/Clinics covering all the medical specialties, both inpatient and outpatient. Students will be engaged in mandatory clinical rotations in most of the Divisions and will complete electives in specialty Divisions of their choice. Clinical skills and medical competencies will be acquired gradually under the constant supervision of clinical educators and tutors and will be formally evaluated in an OSCE fashion. To complement the clinical training, students will take advantage of the expanding simulation center, Gemelli Training Center, to master basic and advanced medical and surgical techniques as well as lifesaving maneuvers.

The Gemelli Training Center includes:

- Simulation of clinical cases with real patients
- Soft skills simulation
- Live surgery
- Low-fidelity simulators (task trainers)
- High-fidelity simulators (e.g., childbirth simulator, emergency/urgent care simulator, etc.)
- Augmented reality and Oculus for 3D virtualised FPV environment reproduction
- Robotic simulators
- Wet & dry lab simulators

PRACTICAL-EVALUATION TRAINING (TPV)

According to Article 3 of the Ministerial Decree 9 May 2018, n. 58, the study plan provides for practical-evaluation training activities (TPV) for a total of 15 CFU. The main objective of the TPV is to assess the student's abilities related to "know-how to practice" and "know how to be a doctor". TPV explores abilities in the application of biomedical and clinical knowledge to medical practice; in finding solutions to professional and medical ethical issues; in displaying the right aptitude to solve clinical problems related to the areas of medicine and surgery and related specialties, laboratory and instrumental diagnostics and public health.

TPV are divided in three areas (Surgical Area, Medical Area and General Medicine Area), with each area consisting of 5 credits that shall be acquired during one-month period. The TPV in the Medical Area and in the Surgical Area take place in the Medical Division and Clinical Services of the Gemelli Hospital as indicated in Annex B of the Academic Regulations of the Degree Course in Medicine and Surgery. Both the TPV in Medical and Surgical Area are scheduled in the fifth year, second semester; the TPV in General Medicine is scheduled in the sixth year, second semester and will take place at the outpatient clinic of a General Practitioner having the requirements provided for by Article 27, paragraph 3, of Legislative Decree 17 August 1999, n. 368, on the basis of the agreements signed between the University and the local professional association of Physicians and Surgeons which is competent for the specific geographical area.

The clinical instructor or the medical director of the Division attended by the trainee and the General Practitioner are responsible for the certification of attendance and the evaluation of TPV. They issue, each for their own area of competence, a formal attendance certificate, together with the evaluation of competencies demonstrated by the trainee and stating, when required, a written evaluation (suitability judgment). At the end of each period, the coordinating Tutor, identified by the Degree Course Council for each TPV Area, expresses, in the event of a positive assessment, a suitability judgment.

The TPV is passed only if the suitability judgment is achieved in each of the three areas.

The specific skills acquired in each TPV Area / Scope are indicated in the trainee's evaluation book according to Annex C of the Academic Regulation of the Degree Course in Medicine and Surgery, which is delivered at the beginning of the first TPV period. The student, the division instructors and coordinators are required to fill it as appropriate.

The student is required to keep the book until graduation, as it constitutes an official document to attest the acquired qualification and to obtain listing in the professional membership association.

OPTIONAL PROJECT AND VERTICAL DOMAIN COURSES

Optional Project and Vertical Domain courses are two different categories of additional credit-bearing activities. The activities are coordinated by a faculty member and participation may take different forms.

Optional Projects are elective academic courses that include additional interdisciplinary content. Activities within project options may range from seminars to single-focus courses, debates, events, congresses, movies and so on.

Vertical Domain activities are transversally related courses that complement students' clinical education with highly specialised and current notions and content on medical research and parallel documentation.

The Master's Programme Council (CCL – *Consiglio del Corso di Laurea*) approves the annual optional activities offering on the basis of proposals put forward by Faculty members.

The activities may take place at any time during the year, including outside the normal academic calendar year. The calendar for all Optional Project and Vertical Domain courses is published at the beginning of each academic year.

Students are required to choose elective activities (either through Optional Projects or Vertical Domains) up to 8 credits by the end of the sixth year to complete their study plan. However, they are allowed to choose elective activities even for a number exceeding 8 credits. The CCL will certify these activities, even if they exceed the 8 credits required.

To acquire the relative Optional Project and Vertical Domain Credits, 100% attendance is mandatory.

THEOLOGY COURSES

Objectives

Theology courses complement curricular content with a critical knowledge of Catholic values which can be applied to an educational and professional path.

All students enrolled on *Degree Programmes* at Università Cattolica are required to attend Theology courses, in addition to activities set down in their study plan.

Theology Courses

36-hour semester Theology courses cover three years of study at undergraduate level and one 30-hour semester course is programmed at graduate level.

Programme

Year One: *Theology 1: Introduction To Christology And Holy Scriptures*;

Year Two: *Theology 2: Introduction To Theological Anthropology And Ecclesiology*;

Year Three: *Theology 3: Introduction To Ethics And Christian Ethics*;

Year Four (Graduate level): *Course on Bioethical issues (either seminars or a single-focus course)*.

The 30-hour (graduate level) course semester course is held either as seminars or as a monographic single-focus course, according to the denominations set by the College of Professors of Theology. The course ends with a test set by the teacher.

Professors and course programmes

Information about Theology courses and professors/instructors is available on the University *website*: <https://www.unicatt.it/ateneo/governance-e-organi-dell-ateneo/collegio-dei-docenti-di-teologia/corsi-e-docenti-di-teologia.html>

The programs of the theology courses can be consulted by accessing the section of the University *website*: <https://roma.unicatt.it/polo-studenti-e-didattica-programmi-dei-corsi-e-orari-delle-lezioni/RM/>

INTERNATIONAL EXPERIENCE

INTERNSHIPS ABROAD

The Medicine and Surgery Programme allows, solicits, and highly values learning experiences abroad. Through the on-campus Cattolica International office, students can apply for a Programme in over 20 international destinations, in Europe and worldwide. Additionally, Cattolica has signed formal agreements with important medical institutions in the USA, including Johns Hopkins Medical School, Sidney Kimmel Medical College at Thomas Jefferson University, and Northwestern University Feinberg School of Medicine.

Starting from year 4, students can do clinical rotations in any of these destinations. The second semester of the final year is entirely dedicated to clinical elective rotations. Cattolica is constantly building a growing network with partner institutions, mostly in North America but also in the Gulf region, Asia, China, and Australia, allowing for unprecedented opportunities for exchange.

Clinical and Research Electives Network.

The programme allows students to apply to EU and non-EU partner universities to undertake an international clinical and/or research internship.

The programme is aimed at students who remain enrolled at Università Cattolica throughout the duration of their stay abroad.

Applications open in April-May of the year before the internship will be undertaken. Departure would be during the second semester.

Scholarships are available, in the amount of €300 to €500 per month.

Credits can be recognised for the internship according to the criteria indicated in the course teaching regulations.

Your Clinical Elective

The programme offers the opportunity to carry out an international internship at EU and non-EU healthcare institution and/or hospital selected autonomously by the student.

The programme is aimed at current students and recent graduates (i.e., no more than 12 months after graduation when the internship starts) who have identified a destination where they can carry out clinical practice or research.

Students can apply at any time, but it is their responsibility to check for visa and other requirements to enter the Country.

Students can undertake the programme whenever he/she wishes so long as there is an agreement between Cattolica International and the host institution. There is no limit to the number of elective rotations, nor a predefined list of destinations.

Scholarships are available for all participants, whilst funds last.

Credits can be recognised for the programme according to the criteria indicated in the course teaching regulations.

VSLO Internship Programme

The programme is offered in partnership with the AAMC-VSLO Network (Visiting Student Learning Opportunities) and gives students the opportunity to undertake an internship at prestigious healthcare facilities in the United States and in other countries

The programme is aimed at students enrolled in the Master's Degree in Medicine and Surgery.

Student can apply at any time, but it is their responsibility to check for visa and other requirements to enter the Country.

There are no fixed dates: student can undertake the programme whenever he/she wishes so long as there is agreement by Cattolica International and the host institution.

Scholarships are available.

Credits can be recognised for the programme according to the criteria indicated in the course teaching regulations.

SEMESTER AND DOUBLE DEGREE PROGRAMMES

Semester or year abroad

The Exchange Programme (**Erasmus+** and **Overseas**) gives Cattolica students the opportunity to apply for a semester or academic year abroad at an EU destination in the Erasmus+ network or at a non-EU Overseas destination. The call for applications opens once a year: in October/November for departures in the following academic year.

All students enrolled in the Medicine and Surgery Programme at the time of application can apply for the programme. There is a limited number of places for each destination, and these are assigned based on academic merit ranking.

Scholarships are available for all participants. Exchange students are exempt from academic costs at the destination universities.

Students are responsible for all other expenses during the period abroad.

Semester abroad

The **Free Mover programme** gives Cattolica students the opportunity to apply to EU and non-EU universities for a semester abroad if the Faculty has an Erasmus+ or Overseas agreement with them. Student can select courses from host universities' academic offering, apply to Università Cattolica for recognition of the results of exams equivalent to your home exams, and enjoy services at

the host university abroad similar to those offered under the Exchange Programme (Erasmus+ and Overseas). The programme opens once in each academic year.

Universities in the Exchange (Erasmus+ and Overseas) programme are all potential destinations for those on the Free Mover programme. Some of these universities may not accept free movers, so students must be sure to refer to the regulations when selecting their destination.

There are no specified prerequisites for the programme. Student must, however, contact the partner university himself/herself and satisfy their specific requirements.

Double degree UCSC-TJU

Cattolica University offers students of the Medicine and Surgery Programme the unique opportunity to select an excellence track leading to a Double Degree in Medicine with Sidney Kimmel Medical College at Thomas Jefferson University, along with a possible Master of Science with a concentration in global health and policy.

Students selected for the Double Degree Programme will be enrolled at Sidney Kimmel Medical College at the end of year 3 at Cattolica University and will complete the full JeffMD Programme of Medical Education in the USA. While progressing in their student career at Thomas Jefferson University, Cattolica will recognise equivalent credits towards the completion of the Programme in Italy.

A maximum of 20 students are allowed to participate in the selection process, including two summer sessions at Thomas Jefferson University, and up to six students will be finally enrolled at Sidney Kimmel Medical College.

SHORT PROGRAMMES

Language courses abroad.

Cattolica International works together with Keiron, a company specialised in study guidance and organisation of language courses, with a view to support student in finding a language course abroad which suits him/her perfectly. The programme offers English, French, German and Spanish courses. Courses are in person or online.

All current students and recent graduates (up to 12 months after graduation) can apply to the programme.

Enrollment is always open; student can register up to one month before the closing date. Student can visit the website and contact Keiron at info@keiron-education.com to schedule an individual appointment and choose the ideal language course for him/her.

Student can choose the start date and the length of him/her course (courses last from 2 weeks to 6 months).

Summer Programmes.

Student can spend between 2 and 8 weeks abroad during the summer at one of partner universities. Student can select exams to take while he/she is at the destination university and apply for the relevant credits to be recognised when he/she returns.

The programmes are aimed at current students and recent graduates (up to 12 months after graduation) who wish to take one or more courses at a university abroad during the summer months. No minimum grade average is required to apply.

Applications for some programmes are open from December onwards. General application will open in January. Each destination has a different closing date, varying between February and April. Departure dates and the length of the programmes vary depending on the destination, but all courses last between 2 and 8 weeks and take place during the summer months, with most taking place in July and August.

Scholarships based on academic merit are available for all destinations

Thesis abroad.

The programme provides scholarships to support undergraduate and postgraduate students who have independently identified an opportunity to conduct international research for their thesis.

To apply for the programme student will need: submitted 'thesis subject' form; letter of introduction from an academic member on university letterhead; document of acceptance from the host institution.

Student can apply at any time, but he/she must complete his/her application at least one month before the scheduled start date.

Student can start the programme whenever he/she wishes, subject to agreement with his/her supervisor at Università Cattolica and the host organisation/institution.

There is no predefined list of destinations, so in agreement with a Università Cattolica supervisor, student can select the most suitable destination to conduct research for the thesis (e.g. universities, libraries, research institutes, non-profit organisations, companies etc.)

Scholarships are available to all participants for periods of up to 3 months, while funds last. There are no restrictions regarding income or academic merit.

International Volunteering.

The programme gives Università Cattolica students the opportunity to take part in cooperation, development and support projects in local communities. Destinations in Europe, Asia and Africa.

The programme is aimed at current students and recent graduates (up to 12 months after graduation). No previous volunteering experience is required.

Applications open and confirmation of destinations on offer are in February – March; applications close in April. Departures are in June, July and August.

Student can select the field he/she wishes to volunteer for in line with his/her studies or specific interests: Childcare & Teaching; Community & Women's Development; Environmental & Wildlife Conservation; Health Education; Sustainable Agriculture.

Scholarships based on academic merit are available.

Students can request the recognition of the program as a curricular internship.

COMPULSORY ATTENDANCE AND TRACKING METHOD

Class attendance is tracked through an electronic sign-in procedure supervised by the faculty member for each respective course. To register for credit-bearing exams students must have their Attendance Book signed by the relevant integrated course coordinator. Validation of attendance only takes place in the period immediately following completion of the relative class/course.

Students with attendance below the minimum requirement (65%) must contact the Coordinator of the Integrated Course to arrange additional activities necessary to compensate for low attendance

Students with an attendance record below 40% for a given course will not be allowed to take the related exam. They will be required to take the same integrated course again in the following academic year with required mandatory attendance.

Calculation of the attendance percentage is based on the number of classes attended and not on the number of hours of each individual class.

By the 1st semester of the Academic Year 2024/2025, attendance will be registered via smartphone. From the moment a student validates his/her presence in class, the system will calculate the partial percentage of attendance reached up to that moment.

The student, through the appropriate section of iCatt app will be able to consult the percentages of attendance for each integrated courses.

Students are required to install the app “UCSC Rilevazione Frequenze” on their smartphones.

Student unable to validate the push notification due to force majeure can ask professors to justify it.

Practical activities and professional training courses are excluded from the electronic recording of attendance, and procedures for verifying attendance are determined by each instructor/coordinator.

Students can view their enrolment and attendance percentages in real time on their personal iCatt page.

EXAMS – REGULATIONS FOR PRE-REQUISITES

Some exams may not be taken unless other specific prerequisite examinations have been previously passed. The mandatory requirements between the courses are listed below.

You must have passed the exams of:	Before you can take the exams of:
<i>1st YEAR</i>	
Basic sciences	Gene Regulation and Cell Metabolism
Life of Cells, Tissues and Microbes Gene Regulation and Cell Metabolism	Functional Architecture of the Human Body
<i>2nd YEAR</i>	
Functional Architecture of the Human Body Microbe-host Interaction Cellular and Molecular Pathology	3rd Year Exams
<i>3rd YEAR</i>	
Mechanisms and Manifestation of Diseases Approach to Diagnosis and Treatment	Exams of 2nd Semester
Introduction to Clinical Medicine	All Blocks
<i>6th YEAR</i>	
All Blocks	Being a Physician

In accordance with the provisions of the Ministerial Decree no. 58/2018, students who have not successfully passed all the exams related to the first four years of the course cannot access the practical-evaluation training (TPV).

STUDENT STATUS

Two student status categories are assigned based on students' academic standing and fulfilment of degree programme requirements.

- Status: 'regular' (*in corso*)

This status applies to students who have satisfactorily complied with attendance and examination requirements for their Degree programme.

Students with 'regular' status can take exams in the year in which they have enrolled during the programmed ordinary examination sessions. Outstanding examinations may be taken during the extra examination sessions during the same year.

- Status: 'outside prescribed programme duration' (*fuori corso*)

This status category applies to students who have not passed all the exams necessary for admission to the final exam within the normal duration of the study course and/or students who have not completed their academic qualification by the last graduation session useful for the regular enrolment.

Students who are assigned this category can take outstanding exams during ordinary, extra and dedicated sessions to 'outside prescribed programme duration' (*fuori corso*) students.

RENEWAL OF ENROLMENT

The first instalment of annual tuition and university fees must be paid before enrolment can be renewed. Until payment of the required fees has been received, students will not be able to attend classes, register for credit-bearing exams or register for their final exam. Student records will be updated and enrolment will be effective when the outstanding fees have been paid, together with payment of any additional fee due.

Enrolment for the academic year is automatic upon receipt of payment of the first instalment of tuition and university fees. The first instalment is non-refundable and enrolment may not be cancelled (see Art. 4, Paragraph 8, of Title I "General rules" of the University Academic Regulations and Art. 27 of the Students Regulations, approved by Rector's Decree No. 1269 dated 4 June 1938).

Information regarding tuition and university fees is available in the "Tuition and university fee regulations" at <https://www.unicatt.it/ammissione/costi-e-opportunita/quanto-costa-studiare-in-cattolica.html>

In line with the regulations, students who are not up to date with payment of their tuition and university fees may not:

- enroll on any program year;
- be admitted to exams;
- obtain a transfer to another degree program or specialisation diploma programme;
- obtain a transfer to another university;
- obtain enrolment certificates.

Students resuming their studies after a break of one or more academic years are required to pay tuition and university fees for the academic year in which they resume their studies, while a deferral fee will be due for each deferred year of studies.

Students resuming their studies at the beginning of an academic year and requesting registration for scheduled exam sessions for previous academic years are required to pay an additional fee.

ADMINISTRATIVE REGULATIONS

Examination Regulations

Each student needs to be aware of the rules and regulations related to the study plan of their degree programme.

Students are reminded that cancellation of examination results can be avoided by complying with the rules of year-to-year progression and by ensuring that they have passed the relevant prerequisite exams before progressing to subsequent exams. Results for exams not taken in the correct order will be cancelled and those exams will have to be taken again.

Grades awarded by examination panels are final and cannot be changed. Once a pass grade has been registered in student records, that exam cannot be taken again (see Article 6.6, Part I – ‘General Rules’ of the University Academic Regulations). The Faculty has the prerogative to stipulate that a failed exam may not be taken again before a specified time period not exceeding four weeks.

Students may leave an examination at any time before it has finished. Students have the right to refuse a grade until it is registered in student records. If a student fails an exam, such information will be retained exclusively for statistical purposes and will not be recorded in the student’s record

Students are required to present the following documentation at exam sessions:

Badge (Student ID card);

valid ID document.

Committee for exams

Members of examination committee for exams are nominated by the Faculty Dean. Each panel is made up of a minimum of two members: the coordinator of the course who acts as Chair, and one other faculty member. Should the Chair be absent for any reason, the position will be taken by another faculty member appointed by the Dean of the Faculty or by the Chair of the Degree Program Committee or by the Chair of the committee panel him/herself.

The Chair of the exam committee may indicate the need of sub-panels to ensure that the exam is run properly and efficiently.

FINAL EXAM

The final exam acts as State exam and directly qualify graduates to practice the Medical Doctor-Surgeon profession if the practical-evaluation traineeship is positive as referred to in Ministerial Decree n. 58/2018.

The final exam for the award of a degree takes the form of the defence of a thesis written on a subject previously agreed with the supervising faculty.

The thesis must be prepared in an original way by the student under the guidance of a supervisor and possibly by a co-supervisor appointed by the latter. The objective of the final exam is to complete the student's personal and scientific education, through designing, planning, conducting and analyzing research work.

Admission to the final exam is subject to the obtainment of all the credits related to the activities of the study plan, including those related to the internship activities and of Practical-Evaluation Training (TPV).

The final exam includes two steps, the "dissertation" and the "graduation", which can take place at two different times.

During the **Dissertation**, the candidate should present his/her thesis during a 40 minutes' session (25-30 minutes for the presentation and 10-15 minutes for the discussion during a Q&A session) before a Dissertation Committee, chaired by the President of Study Programme or his/her delegate, and composed by the candidate's supervisor, the co-supervisor and two experts and/or connoisseurs of the thesis subject.

The Committee evaluates exclusively the thesis and its presentation, awarding a maximum of 10 points, based on parameters such as "originality and effort" (up to 4 points), "mastery of the topic" (up to 3 points), "quality of presentation" (up to 3 points).

During the **Graduation** session, the candidate is given up to 10 minutes to present his/her thesis before a Graduation Committee, which is chaired by the President of Study Programme or his/her delegate, and further composed by at least 10 members. Amongst these: the candidate's supervisor/co-supervisor, at least one member the Dissertation Committee, and, following art. 1.3. f of Italian Legislative Decree 13 September 1946, no. 233, as modified by art. 4.1 of the L 11 January 2018, no.3, a representative of the local (Province) Association of the Surgeons and Dentists, who supervises the legitimate unrolling of the final enabling exam, and the candidate's eligibility to the practical-evaluation training, according to D.M. no. 58/2018. The O.M.C.E.O. representative cannot participate to the evaluation of the candidate and to the final grading.

The Graduation Committee can engage the candidate in a Q&A session of up to 5 minutes to evaluate the candidate's mastery of the topic (up to 3 points).

Both the Dissertation and the Graduation sessions are open to the public.

The final score can range from 66/110 to 110/110. The final enabling title is obtained if the candidates achieve a minimum score of 66/110 and if he/she can document, through the student's TPV booklet, that, during the practical-evaluation training, he/she has acquired all the skills described and certified in the booklet.

The final graduation score is calculated by adding:

- the **weighted average of the final scores of the exams of the entire study programme**. The weighted average is then divided by 3 and multiplied by 11. The exam's score 30/30 cum laude counts as 31.
- the **score given to the final thesis (up to 10 points)**, which in turn is composed by: the score on 'originality and efforts' (up to 4 points) and 'quality of presentation' (up to 3 points) given by the Dissertation Committee and the average of the scores given to 'mastery of topic' by the Dissertation Committee and the Graduation Committee (up to 3 points).
- an **additional score** given to any clinical/research activities abroad, any publications, the score obtained in the IFOM test, the average of the score obtained in the theology exams, and calculated on the base of the table below:

Clinical/Research activities abroad <i>(up to 1 point)</i>	1 month of full-time internship (ruled by a learning agreement, certified and evaluated)	up to 0,5 point
	6 o 12 months (one or two semesters) with successful completion of a minimum of 2/3 of the practical and theory activities set out in the learning agreement	up to 1 point
Publications <i>(up to 2 points)</i>	Work published or officially accepted by journals with an impact factor, where the candidate is author or co-author	up to 2 points

Score obtained in the IFOM test	≥ USMLE Step 1 Test Passing Threshold	4 points
	≥ median score achieved by international students in comparison	2 points
Consideration for the ethical and moral aspects of Medicine	average of the score obtained in the Theology exams	$\geq 30 \leq 30$ cum laude: 0,3 points $\geq 25 \leq 27$: 0,2 points $\geq 18 \leq 24$: 0,1 points

Honour can be awarded by unanimous decision of the Graduation Committee to the candidate who obtains a minimum overall score of 115/110.

TRANSFER CONDITIONS

Transferring to another university

students may request transfer to another university. After a proper check of the study rules and regulations of the potential destination university, application for transfer can be submitted to Student Services between July 15th and October 13th. Please note that if the deadline for the other university is earlier than October 31st, application will have to be made earlier to allow for sufficient processing time.

Transfer applications submitted after October 31st and before December 31st will be subjected to a late application fee based on submission date. Transfer may not take place without prior acceptance by the destination university.

The student who intends to transfer to another University is required to follow the online procedure "Transfer to another University" by accessing the following page on the university webpage: <https://studenticattolica.unicatt.it/strumenti-e-supporto-modulistica?rdeLocaleAttr=en>

Before authorisation for transfer can be given, the student in question must have:

- verified via iCatt his/her academic record and notified the registrar of any correction to be made or request the addition of missing data;
- requested via iCatt a transcript of records from Student Services showing all exams that have been passed;
- settled all related tuition and university fees outstanding at the moment of application.

The transfer application must bear a revenue stamp to the value set down by legislation in force.

Students are not allowed to take any further exams after submission of an application for transfer. Students who transfer to another university may not transfer back to Università Cattolica before one year of the date of transfer. Students who are readmitted to Università Cattolica are admitted to a particular year based on passed exams and not on their previous enrolment year. They may also be required by the Faculty Board to pass further exams to bring their studies up to the level of the Università Cattolica students.

Transferring to Università Cattolica from another university

Admission procedures after year one for programs with limited numbers of places are decided by the relevant university bodies, in line with university regulations. These procedures are determined based on the number of places available in each given year and consider compliance with the selection criteria as stated in the call for admissions and the admission rules.

An Evaluation Committee appointed by the Chair of the Master's Degree Programme Committee Council rules on recognition of previous studies carried out at other universities.

Withdrawal/Intermitting

Students have the right to withdraw from their program. First, they will be required to settle any outstanding tuition and university fees before applying for withdrawal.

The student who intends to withdraw is required to follow the online procedure "Application for renunciation of studies" by accessing, with his iCatt credentials, the following page on the university website: <https://studenticattolica.unicatt.it/strumenti-e-supporto-modulistica?rdeLocaleAttr=en>

No terms or conditions can be added to the written request/reason for withdrawal in the application.

Students who withdraw can request documentation certifying their academic record up to the date of withdrawal as long as their administrative record is up to date.

The following categories of students may not enrol on a new academic year and will therefore no longer be officially considered as current students:

those who have not enrolled for five consecutive years;

those who, at the end of their prescribed programme duration, have not passed any examinations for five consecutive academic years. This does not apply to students missing only the final exam, i.e. those students who have earned all necessary credits apart from those given with the final exam.

Enrolled students have the right to submit application to intermit, i.e. to suspend studies temporarily for the purpose of enrolling on and attending a specialising master's programme, a specialty training programme, or a doctoral programme. At completion of intermission students may go back to their original study programme provided it is still being offered.

Teaching Evaluation

The Ministry of University and Research (MUR), has issued directives that Universities must carry out assessment of course teaching for every Integrated Course.

This evaluation is carried out through course evaluation questionnaires that are administered to all students. Completing the questionnaires is mandatory in order to take the exam for the course to which the questionnaire refers.

EDUCATT

Università Cattolica del Sacro Cuore organisation for the right to education

EDUCatt is a non-profit foundation which Università Cattolica has engaged to support students with regard to access to study, attendance and compliance with academic rules by managing services related to the right to university education.

EDUCatt is active on Università Cattolica campuses in Milan, Brescia, Piacenza-Cremona and Rome, offering a series of services designed to facilitate and enhance the study experience:

- assistance to newcomers, financial aid, scholarships, supplementary financial support, student loans and other financial means;
- accommodation, student housing and University residences, and private advertisements for housing;
- meals catered to university users, available in facilities directly managed or sub-contracted;
- books – solutions and resources, distribution of EDUCatt editions specifically for university courses, free book loans and facility for the sale of used books;
- health care and psychological assessment and counselling, infirmary, general and specialist appointments;
- travel and study-holiday opportunities, special offers by CTS (student travel agent and EDUCatt partner);
- student support for cultural activities;
- direct communication with EDUCatt for inquiries and information about the services available.

TUTORING

The group tutoring service is available for all students of the single-cycle master's degree course in Medicine and Surgery, although it is intended most specifically for first-year students.

The tutors are selected by a special Faculty commission among young graduates and among students of the 4th, 5th or 6th year who submit their candidacy to the call published annually by the University based on the evaluation of their *resumè* and the results of an interview aimed at investigating the aptitude for the role. The proximity of age and course with the students is fundamental (in fact, tutors must be under the age of 30 and have attended the same course as the students they will have to follow) and they need to have adequate training.

With the joint work of a team made up of teachers, psychologists and administrative representatives, the group tutors organize various meetings aimed at providing students with technical, methodological and psychological skills.

The tutoring service is coordinated by the Tutoring office of the Rome office and is supervised by a reference professor appointed by the Faculty Council.

Furthermore, the group tutor welcomes freshmen when they first enter the university (during the Welcome day) by providing guidance and information regarding the specifics of each degree course, the organization of the study plan, the planning of exams and the use of the services that the University offers. In addition to welcoming, the tutor is also in charge of the personalized and group accompaniment of the students during their entire academic career. To this end, the tutor organizes small group meetings (IPG), monitors careers and, during the hours dedicated to the weekly reception of students, carries out a series of activities useful for identifying an effective study methodology and any obstacles to the learning path and important for trying to minimize the risk of isolation which is one of the most critical factors with respect to the issue of university abandonment.

If necessary, the tutor also supports secondary school students during the orientation initiatives organized by the University.

Information relating to the Tutoring service is available on the University website at the following link:

<https://studenticattolica.unicatt.it/tutorato-di-gruppo-che-cosa-e-un-tutor-di-gruppo>

SERVICES FOR INCLUSION OF STUDENTS WITH DISABILITIES, WITH SPECIFIC LEARNING DISABILITIES (DSA) AND WITH SPECIAL EDUCATIONAL NEEDS (BES)

The Università Cattolica del Sacro Cuore warrants to all students with disabilities, specific learning disorders (DSA) and special educational needs all the measures and compensatory instruments to preserve their rights.

At the Student Center Services (Polo Studenti) it is established the “Services Secretariat for the integration of students with disabilities and with DSA”, whose role is to support students with disabilities and diagnoses of specific learning disorders (DSA) and special educational needs (BES) during their university experience, from the early stages of orientation up to the attainment of the Degree, through technical-administrative and academic support, provided by specialized staff.

Technical-administrative support consists of:

- management of administrative procedures;
- accompanying service for students with disabilities to the classes;
- mediation on educational material.

The academic support consists of:

- orientation: support for students with disabilities and DSA diagnosis in the choice of study programmes and during the initial phase of the attendance to the activities, through useful information and strategies on how to undertake the course;
- pedagogical advisory service: through individual interviews and group meetings, specific educational needs of students with disabilities and DSA diagnosis are identified, in order to guarantee successful attendance to classes and exams results.

Students with disabilities and DSA/BES diagnoses can access the support services by submitting one of the following valid documents to the “Secretariat of Services for the integration of students with disabilities and with DSA”:

- civil invalidity certificate, pursuant to Articles 1 and 2 D.L. 1 July 2009, n. 78, or a corresponding document issued by the relevant institution of the student’s own country
- report of handicap verification, pursuant to Article 4 Law n. 104, 5th February 1992 or corresponding document issued by the relevant institution of the student’s own country
- certification (no older than 3 years) issued by a healthcare institution or by other accredited institutions or specialists, that certifies the diagnosis of one of the specific learning disorders referred to in Law n. 170/2010 - dyslexia, dysgraphia, dysorthography, dyscalculia - and the appropriate medical codes.

Students with temporary disabilities can also apply for support, upon provision of a medical certificate attesting the temporary disability (e.g.: fracture of a limb).

CARRIERA ALIAS

Students enrolled in any course of study offered by Cattolica University who have started a gender transition process can request activation of the “*carriera alias*” to use the chosen name throughout their university course, from taking exams to discussing their thesis and the proclamation.

The *carriera alias* provides for the assignment of a temporary identity that remains active for the entire duration of the university course or until the gender change ruling pursuant to Law no. 164/1982 is issued if this occurs during the study course.

After activation of the *carriera alias*, the chosen name will appear on the badge, in the institutional e-mail address and in all the University information systems and it will not be possible to trace the personal name.

The use of the chosen name and the personal alias will be valid only and exclusively within the University. Certifications referring to the applicant issued by the University for external use will refer exclusively to the personal identity and not to the *alias* identity.

The University will verify the possibility of using the *alias* personal data also with respect to third parties (for example, in the case of internships, placements, outgoing mobility projects, requests for scholarships financed by third parties).

The *carriera alias* is effective from the moment of signing a specific deed of commitment between the applicant and the Università Cattolica until the moment of interruption of the academic career, without prejudice to requests for interruption advanced by the applicant or the causes of deactivation for violation of the obligations set out in the deed of commitment.

The methods for activating the *carriera alias*, the obligations of the applicant and the consequences of violations of these obligations are contained in the Guidelines published on the University website (<https://www.unicatt.it/landing/istituzionale/pari-opportunita-e-inclusione/linee-guida/carriera-alias.html>)

ONLINE SERVICES

Students' personal online page (iCatt)

All students have a personal iCatt webpage which provides access to administrative services and information about courses, e.g. timetables, exam sessions, announcements etc. The online registrar section provides access to students' Study Plans and to their current exam situation (exams already taken and outstanding exams). It also allows students to register for exams and update their income and tax information. The iCatt homepage will show communications from Student Services via an online notice board.

Students can access iCatt by going to <http://icatt.unicatt.it> and by entering their personal login and password.

For assistance in accessing iCatt please send an e-mail to gestione.iam@unicatt.it

Faculty members personal online pages

Faculty members have an online page giving relevant information such as email addresses, office hours, courses and syllabi. Access is via <http://docenti.unicatt.it>.

HEALTH SURVEILLANCE

Health Surveillance: definition and objectives

Health Surveillance is a set of medical acts, provided for by current legislation (Legislative Decree 9 April 2008, n. 81, integrated and amended by Legislative Decree 3 August 2009, n. 106, and subsequent amendments and additions), aimed at protecting the health and safety of workers, in relation to occupational risk factors, the work environment and the methods of carrying out work activities.

Subjects under Health Surveillance

Workers and their equivalents (e.g.: students) who, according to the Risk Assessment Document (DVR), prepared by the employer, are exposed to a or more risk factors for which current legislation requires health surveillance are subject to Health Surveillance.

Health Surveillance activities

The health surveillance activities are carried out by the competent M.D. of the Università Cattolica starting from the first year of the course, with a frequency established based on the type of risk to which the worker - student is exposed. These activities are performed at the Health Surveillance Unit located at the Istituti Biologici.

Considering that students who have not completed their courses continue to attend professional training environments even after completing their teaching activities, health surveillance does not stop and must be complied with at the scheduled intervals until the study cycle is completed.

The health surveillance protocol may include:

- **Preventive medical examination:** The preventive medical examination aims to ascertain the absence of contraindications to the work (professional training) that the worker – student is destined for.
- **Periodic medical examinations:** Periodic medical examinations serve to monitor the health status of the worker – student over time, not only by identifying early any health damage resulting from exposure to professional risk factors, thus reducing the risk of occupational diseases and workplace injuries, but also by contributing to their prevention of these and to the “well-being” of the worker – student.

The Health Surveillance process, in order to obtain the Work Fitness Judgement, may include, depending on the competent doctor’s evaluation, the execution of:

- **Laboratory tests:** tests can be used to assess the worker – student’s exposure to certain chemical or biological agents.
- **Other diagnostic tests:** The competent doctor may order other diagnostic tests deemed useful, such as electrocardiograms, spirometry, audiometry or X-rays, *etc.*
- **Vaccinations:** Health Surveillance can also be an opportunity to verify mandatory and/or recommended vaccination coverage.

Objectives of Health Surveillance

The main objectives of Health Surveillance are:

- **Assess Work Fitness:** Health Surveillance allows for determining the work fitness of the employee, that is, their psychophysical ability to perform their assigned duties safely and without risks to their own health or that of others, expressed through the issuance of the Fitness Judgment.
- **Prevent health damage:** Health Surveillance helps prevent health damage to the worker - student resulting from exposure to occupational risk factors.
- **Promote health:** Health Surveillance is also an opportunity to promote the health of the worker - student by raising awareness of occupational risks and providing health education advice.

Health Surveillance is mandatory, without which the Fitness Judgment is not issued. Any refusal or failure to attend the examination results in an impediment to the student’s clinical activity, professional training, and internships. From this perspective, the certification of the examination, issued by the competent doctor, is a prerequisite for the same.

HEALTH AND SAFETY AT WORK

Università Cattolica del Sacro Cuore is committed to protecting the health and safety of all those who work within it, including students.

When attending teaching or research laboratories, performing activities within healthcare facilities, or when exposed to occupational risks due to specific activities, students are considered as “equivalent workers.” Therefore, in compliance with the obligations regarding health and safety at work provided by Legislative Decree no. 81/2008 and subsequent amendments and additions, each student, as equivalent to a worker, has the right to receive and consequently is obligated to complete a training program.

The health and safety training program includes an initial step of general training, in addition to which further specific training must be conducted in relation to the risks associated with the tasks and work environments characteristic of the activity. Participation in these courses is mandatory to access internship activities.

The **general training course in health and safety at work** meets the requirements set out by Legislative Decree no. 81/2008 and subsequent amendments and additions, and the current State-Regions Agreements, and is delivered via e-learning. The course lasts 4 hours, dedicated to presenting general concepts on prevention and workplace safety. It includes ongoing self-assessment tests and a final test to evaluate the knowledge acquired during the course, enabling the issuance of the final training certificate.

The registration of students for the general training course is done directly by the Università Cattolica del Sacro Cuore following enrollment. Each student receives all the information, the link to the platform, and access credentials via their institutional email to complete the course, which is mandatory before starting their professional internship.

General training does not require updates as it constitutes a permanent educational credit and has been designed to be valid for any work sector. It can be recognized by companies that require it for their employees, as provided by Article 37 of Legislative Decree no. 81/2008 and subsequent amendments and additions, and the State-Regions Agreement.

Students who have already attended the general safety training course in other contexts (work or academic) as required by Legislative Decree no. 81/2008 and subsequent amendments and additions, can request recognition of the training by submitting a copy of the attendance certificate to: ser.sicurezza-rm@unicatt.it. The subject line should read "safety certificate: SURNAME and student ID," and the email must include the certificate, name, surname, tax code, student ID, and course of study.

The Università Cattolica del Sacro Cuore verifies the validity of the certificate and communicates the outcome. If favorable, the student is exempt from the general training course obligation.

General training is a prerequisite for the specific training course.

Specific training, in accordance with the current State-Regions Agreements, lasts 4, 8, or 12 hours, determined by the company’s risk classification based on the occupational risks present in the work environments (low, medium, or high risk) and the task performed by the worker or equivalent worker.

Specific training can be delivered both via e-learning and in-person, based on the company’s risk class. This training is valid for 5 years, after which an update of no less than 6 hours must be completed.

Specific training delves into the occupational risks a worker may be exposed to during their activity, potential damages, and the prevention and protection measures to be adopted. It explicitly addresses the unique content and situations characteristic of the daily operations and health and safety organization specific to each company. Therefore, the specific training course is designed and delivered directly by the teaching site where the professional internship takes place, which will provide students with relevant information regarding the delivery methods and duration of the training based on the risks present in the specific work context.

STUDENT RECORDS AND ACADEMIC SUPPORT SERVICES

The Student Records and Academic Support Services manage academic records and oversee the organisation of the Faculty of Medicine and Surgery's Degree Programme.

Contact information

Location: Largo Francesco Vito, 1 – 00168 Roma (Istituti Biologici)

Tel: 06/30154757

e-mail: gestione.carriera.studenti-rm@unicatt.it

Officer in charge: Dott.ssa Francesca Mencarelli

STUDENT SERVICES CENTRE (POLO STUDENTI)

The Student Center (Polo Studenti) is responsible for the administrative management of student careers from registration to the earning of the title. It is the office that students can contact for:

- general information on career
- monitoring and career changes (transfers, courses, interruptions of studies, validation, study plans, etc.)
- registration contributions (payments, refunds, etc.)
- certificates

It is possible to contact Polo Studenti through the personal page of the iCatt portal using the “Request information” function in the “Communications for you” box.

The Student Center has the following opening hours:

- Monday: from 9:30 a.m. to 2:00 p.m.
- Tuesday: from 1:00 a.m. to 4:00 p.m.
- Wednesday: from 9:30 a.m. to 2:00 p.m.
- Thursday: from 1:00 a.m. to 4:00 p.m.
- Friday: from 9:30 a.m. to 12:00 a.m.

At the Student Center there is also a public service by appointment via Microsoft Teams), which students can book in any case when the presence of the interested party is not required.

While booking an appointment, it is necessary to indicate the reason for the appointment, allows you to reserve a slot time of 15 minutes in which the operator will give specific assistance to the request.

Students can send appointment requests through the following link <https://gestionecode.unicatt.it/qmsui-prebooking-client/inner/prebooking.xhtml> , by booking by 23:59 of the two days before the date of the appointment.

Contacts:

Polo Studenti Rome Campus: University Building "Giovanni XXIII", Largo Francesco Vito, 1 - 00168 Rome

Tel: 06.77644.644 (Monday to Friday from 8:00 to 19:00)

USEFUL INFORMATION

Faculty office hours

Faculty office hours provide an important opportunity for faculty and students to meet outside of class. During these meetings students can clear up doubts about course content as well as get advice on how best to manage their studies. Office hours are published on Faculty personal online pages.

STUDENT SERVICES

In addition to the quality and rigour of the education it offers, and in line with a tradition of prioritising the individual, the University provides an ever-growing array of services, and cultural and recreational opportunities. This means that students have access to suitable support during their university life, in particular when they are facing personal and academic challenges.

Information about the following services can be found online at <http://roma.unicatt.it>:

- Library: biblioteca-rm@unicatt.it; documenti.delivery-rm@unicatt.it; tel. 06/30154057;
- Advising and Tutoring: orientamento-rm@unicatt.it tel. 06/30155720;
- Internships and Placement Service: stage.placement-rm@unicatt.it tel. 06/30154480 - 4590;
- Global Engagement and International Education (international student mobility programmes) ucsc.international-rm@unicatt.it 06/30155819;
- ILAB – Centre for innovation and development of university teaching and technologies (ICT courses and Blackboard): <http://blackboard.unicatt.it>;
- SeLdA – University Language Service (language courses): gerit.beger@unicatt.it tel. 06/30156812;
- Services for inclusion, aimed at students with disabilities, with specific learning disabilities (DSA), as well as with special educational needs (BES) (at the Student Services Centre – *Polo Studenti*, regular office hours): segreteria.disabili-rm@unicatt.it; segreteria.dsa-rm@unicatt.it;
- Public Relations Office: urp.universita@rm.unicatt.it tel. 06/30154203;
- EDUCatt – Università Cattolica del Sacro Cuore organisation for the right to academic education (health service, student cafeterias, housing solutions, book loans) info.rm.dsu@edu-catt.it tel. 06/30155708;

- Cultural and Recreational Activities;
- Psychological Counselling Service;
- Youth Health - Front Office.

UNIVERSITY STAFF

Università Cattolica staff ensures that suitable conditions exist for university services and offices to be used to the full. Staff from Student Services, the library and the logistics office are authorised to enforce regulations regarding the proper use of offices and spaces in the university.

University staff, and security staff in particular, may take measures to prevent or limit any disruption occurring on university premises (Article 47 of Royal Decree 1269/1938). The reports that they file on such events will carry the same validity as a police report.

Università Cattolica staff have specific instructions not to submit documentation on behalf of others or to act on behalf of students for any other procedures at Student Services.

Guarantee of Essential Services

Legislation on the exercise of the right to strike within essential public services and on the protection of personal rights as guaranteed by the constitution – Law No. 146/1990 and Law No. 83/2000 and later changes and additions thereto.

Università Cattolica del Sacro Cuore guarantees continuity of the following essential services for university education, in line with the values and rights guaranteed by Italian constitution:

- registration and enrolment in university programmes and courses;
- final exams and public examinations;

- examinations for annual and semester courses;
- certification to take part in competitive examinations (concorsi) where documented urgency exists of imminent competition deadlines.

PERSONAL INJURY ON CAMPUS

First aid kits are located around the campus to treat small injuries. For serious injuries, students should refer to the Emergency Room of Gemelli Hospital or, in any other emergency situation the Health Emergency Services number should be called (Extension number 5555).

The Emergency Room of the A. Gemelli Hospital is located in the DEA building and is clearly indicated within the campus. Procedures are in place to record accidents happening to staff who are external to the university.

Accidents resulting from biological exposure require the use of different resources, given the specific nature of the type of injury and possible repercussions. In such cases, students must refer to the guidelines found in the Operating Instructions issued by the Gemelli Hospital.

EARTHQUAKES

In the event of an earthquake:

- seek shelter under a table or desk or below a door frame;
- keep clear of bookshelves or other furniture that may fall;
- stay away from windows and glass doors;
- if inside, remain where you are until the tremor ceases;
- if outside, keep as far away as possible from buildings, trees and electric power lines.

THEFT OR ASSAULT

In the event of theft or assault, Security Services should be called: 06 3015 3373.

OTHER USEFUL UNIVERSITY SERVICES

Main university number	06-3015.... (add extension numbers below)
Health Emergency	5555
Central Emergency Management	4000
University Health and Safety Service	5256 – 5809
Fire Safety Unit	5311 – 4683
Security Services	3373
Maintenance Service	5000
Accident and Emergency	4030 – 4031 – 4034
Health Centre	4997 – 4772

CODE OF CONDUCT

University regulations require that students conduct themselves without infringing the personal dignity and honour of others and in line with the spiritual values of the University.

Disciplinary sanctions may be applied to anyone not adhering to the code of conduct. Sanctions will vary depending on how serious the breach of the code of conduct is (see Title I General Rules, 18bis – Disciplinary responsibilities regarding students, in the University Academic Regulations).

Sanctions are decided by the relevant academic bodies in line with procedures which guarantee the individual's right to defence, and in line with current relevant general criteria.

HEALTH, SAFETY AND THE ENVIRONMENT

As set out in its mission, the University's strategic objective regarding health, safety and the environment is directed towards the protection of employees, teaching staff, assistant professors, specialising students, doctoral candidates, interns, scholarship students, students and visitors, as well as the protection of the environment and of anything that is used to carry out University work.

Teaching staff, students and administrative personnel are all expected to be involved in working towards this objective regarding health, safety and the environment, by carrying out regular checks that health and safety measures are being enforced in the workplace and that procedures are communicated adequately and being properly applied. It is everyone's responsibility to inform the relevant authorities of any shortcoming in safety measures or lack of training or information, and to work together with the relevant services for the stipulation and continuous improvement of methods and procedures for carrying out university work.

As set out in Legislative Decree 81/80 and subsequent changes and additions, students are considered as staff with regard to contributing to the improvement of safety measures relating to:

- compliance with rules and instructions given for personal safety and for the protection of others;
- the correct use of machinery, equipment, apparatus, substances and safety devices;
- the correct use of available means of protection;
- immediate reporting to relevant personnel regarding any inadequate tools and equipment as well as any hazardous conditions observed;
- taking action in an emergency, as far as competencies permit, in order to eliminate or reduce any inadequacy or danger;
- unauthorised removal or alteration of any safety device, checking device or alarm;
- unauthorised actions which may put yourself or others in danger;
- undertaking medical check-ups when necessary;
- taking part in training courses organised by the university regarding safety in the workplace;
- contributing to compliance with all health and safety rules;
- conduct which may cause danger to yourself or to others.

Examples of safe conduct

- *in the halls, on the stairs and in lobbies*: do not run; do not leave objects where they might block passageways; leave passageways and emergency exits clear;
- *in institutes, laboratories and libraries*: carefully follow all instructions given by those in charge before using any equipment, apparatus etc.; read and follow the rules and instructions for use and safety instructions; do not use personal equipment or apparatus without specific approval from those in charge; do not carry out unauthorised activities or activities not connected with educational objectives;
- *in spaces where there is specific sign*: do not smoke, do not use naked flames, and do not enter where there is a no entry sign;
- *if buildings have to be evacuated* (a warning message will be heard via loudspeaker): keep calm, immediately inform those present of the emergency and/or call the relevant phone numbers, listen to the instructions given by those in charge, do not use lifts/elevators, follow specific emergency signs to outside spaces, move quickly to the nearest assembly point (shown in the emergency plans displayed in the building), check that all those who were with you have managed to reach safety, inform the emergency team if anyone is missing

EMERGENCIES

Fondazione Policlinico Agostino Gemelli Safety and Fire-fighting Unit is on duty 24 hours a day, including at weekends and during university closure. The unit is in charge of coordinating actions to contain emergency situations such as fires, flooding, gas leaks and hazardous situations caused by any type of accidental breakage.

All students must act as instructed by the coordinator dealing with any particular emergency. Central Emergency Management can be contacted on extension 4000 from a fixed line in the University or on 06 3015 4000 from any other phone; callers will be asked to provide personal information (name, position etc.), information about the type of danger/threat or emergency underway, the number of people involved, as well as a general assessment regarding the gravity of the situation. The caller must remain on the phone with the Central Emergency Management until instructed to hang up.

Plans showing emergency exit routes are posted in all passageways with instructions of what to do in case of an emergency.

Smoking is not permitted

There is a no-smoking regulation in force in all working spaces on University premises. The head of the University Security Services is responsible for the enforcement of this rule and operates with the support of the Security Guards.

Tel: 06 3015 4288

PROTECTION OF PERSONAL DATA

Università Cattolica has adopted appropriate structural, logical and organisational measures regarding the delivery of its services to ensure respect for patients' rights, fundamental freedom and dignity, as well as patients' confidentiality. One of the specific organisational measures taken is the setting down of a code of conduct to ensure that patient data is kept confidential. This code of conduct applies to both healthcare professionals and University Cattolica staff that handle data/personal information. Students are expected to respect and adopt this code in all academic and professional activities. The most important rules to follow are the following:

1. all data that comes into your possession should be considered as confidential and, as such, according to law, subject to professional secrecy. Therefore, the code of conduct must be adhered to for each individual work phase so that data is not lost or accessed by unauthorized individuals;
2. data must only be used for the purposes for which they were collected i.e. prevention, diagnosis and treatment, and generally for the protection of the health of the patient;
3. conduct during consultations with patients should be carried out in such a manner that no information which may reveal their state of health comes to the knowledge of a third party;
4. to protect patients' interests, medical records, medical reports and any other documentation that includes health information must be stored in a safe place and in any event in a location that ensures that the information remains confidential. To this end, the information pertaining to the health status of a patient may be disclosed only to the patient or to persons specifically named by the patient;
5. data regarding genetic identity must be handled exclusively within protected spaces accessible only to those dealing with the treatment and to those specifically authorized to access them;
6. the greatest care must be taken with regard to bone marrow donors who, under Law No. 52 dated 6 March 2001, have the right and duty to remain anonymous both to the receiver of the transplant and to third parties.

Personal Data Protection Legislation

(Legislative Decree No. 196, 30 June 2003 - EU Regulation 2016/679 General Data Protection Regulation - GDPR)

This section gives general information about legislation regarding the protection of personal data as set out in Legislative Decree No. 196 of 30 June 2003, 'Personal Data Protection Regulations' and in EU Regulation 2016/679 General Data Protection Regulation (GDPR). It is a guide for students who come into contact with information about the state of health and the sexual life of a patient while carrying out their studies. This information is usually considered to be the most private and sensitive of personal data since it exposes the individual and may document weaknesses, which may lead to a real risk of social discrimination.

Considering this critical aspect and given all the regulations governing data protection, when students come into contact with sensitive information during the course of their studies they are required to adhere to the code of conduct set out for University healthcare staff responsible for the handling of data.

To ensure that the purpose and aim of the legislation are fully understood, the main points of the regulations are described below.

Purpose of the data protection legislation

The life of an individual can be contained in a cluster of information which on the one hand can identify the person, but on the other hand, if not properly protected, can expose the person to risk of discrimination because of their particular opinions, religious beliefs or state of health. It is for this reason that the right to privacy is essential in an equal society.

The dynamic changes in technology and culture, and the interconnections between various sectors of today's society e.g. health, finance, telecommunications, politics, business and so on, mean that the concept of privacy has evolved, leading to the emergence of a strong connection between privacy and the right to liberty, equality, dignity, and democracy as guaranteed by the Constitution. The concept has developed to the point that the traditional definition of privacy as 'the right to be left alone' has been superseded.

Article 1 of the data protection legislation establishes in fact that every person has the right to the protection of their personal data. This right is recognised as a new form a personal liberty, or rather the freedom to have control over the dissemination of one's

personal data. In the system of protection foreseen by the legislation, therefore, individuals have the right of control over their personal information, the right to confidentiality and the right to a private life — all being expressions of the right to privacy.

What is personal data?

The basic concept on which the legislation is based is the concept of ‘personal data’ (Article 4, (b), of Legislative Decree No. 196/2003): personal data is any information pertaining to a person, a legal entity, organisation or association, identified or identifiable, even indirectly through reference to any other information, including a personal ID number.

A further aspect of this concept is that of ‘sensitive data’, which is information pertaining to the utmost personal sphere of an individual, defined in the legislation as personal data which may reveal racial and ethnic origin, religious, philosophical or other beliefs, political opinions, membership of political parties, unions, associations or religious, philosophical, political or union organisations as well as personal data that may reveal an individual’s state of health and sexual life.

Of particular interest here are the regulations for handling sensitive data in healthcare situations and the related civil and legal responsibility.

What does ‘handling personal data’ mean?

In the legislation (Article 4, No. 1, (b)), ‘handling personal data’ is defined as any operation or group of operations undertaken with or without the use of a computer or an automated procedure, which concern the operations involved in the gathering, recording, organisation, archiving, consultation, processing, alteration, selection, extraction, comparison, use, interconnecting, blocking, communication, dissemination, cancellation and destruction of data even if such data are not recorded on a database.

‘Handling personal data’ therefore refers to all operations which form part of the life cycle of a piece of information, from gathering to destruction. It is pointed out that even a simple viewing of data comes within the activity of ‘handling personal data’.

Responsibilities

Those involved in dealing with personal data as set out in the legislation are as follows:

- The sole holder of ultimate responsibility for handling data, i.e. Università Cattolica del Sacro Cuore, a statutory body with no shareholders, whose functions in this regard are performed by the director of the Rome Campus for the Rome Campus and by the director of the A. Gemelli University Hospital for the A. Gemelli University Hospital and all connected facilities;
- Data controllers i.e. the directors of the various departments and institutes who have been given the responsibility of dealing with personal data by the Campus Director and the Director of the university hospital;
- Authorised data processors i.e. all personnel who actually handle personal information whilst carrying out the work.

Sanctions

The legislation provides for the application of severe sanctions for any breach of the regulations and sets out legal sanctions and a specific set of norms for civil responsibility, as well as specific administrative sanctions.

LEGISLATION ON CONSCIENTIOUS OBJECTION TO ANIMAL EXPERIMENTATION

(Law No. 413, 12 October 1993)

This legislation provides for University students, as well as medical and health personnel, to register their conscientious objection towards any activity connected with animal experimentation.

Students wishing to register their objection should submit their statement of conscientious objection to the faculty teaching the course in question. The relevant form is available at the Centre for Experimental Research (Centro Ricerche Sperimentali).
